

HEALTH & SAFETY POLICY STATEMENT

DIRECTORS STATEMENT OF INTENT

This revision of the Life Build Solutions Limited Safety Management Policy document consolidates and reinforces the corporate commitment to securing a safe working environment for all persons employed by, working under the control of, or whom tasks, operations or processes undertaken by the Company may affect. By monitoring and review, the document takes account of recent and anticipated legislative developments in the management of Occupational Health, Safety and Environmental standards. Those developments alone are not the sole motivators. We consider that commercial success; efficiency, quality, Client satisfaction and social obligations are equally important incentives to achieve a safe place of work. To these ends, we will continue to review and develop our in-house Safe Working procedures using acceptable methods and Risk Assessment techniques, thereby ensuring that Planned Safety Management Procedures will be integral to each Project where the Company is employer or retained.

To assist in maintaining and improving our Safety Management standards we will ensure that the Safety Management Programme is sufficiently resourced, in fiscal, personnel and training terms. All procedures, including this policy document shall be subject to ongoing review. Comment, proposals and suggestions for improving the system of Safety Management will be actively encouraged from all personnel employed by the Company.

The Company, through its Directors and Managers accept that there is a considerable volume of study, research and administration involved in the Safety Management programme and procedures. It is our objective to implement a practical approach to the management of Safety. Safe Working Instructions and Procedures shall at all times be prepared and presented so as to be discernible and workable to all personnel involved on a project or task.

Life Build Solutions Limited, require that suppliers of goods and services shall provide the Company and its employees with information, materials and products which incorporate and allow for the unique requirements of Safety Management on the Company's projects. This requirement extends to Managers and Personnel employed by or working under the control of the Company and will assist in reinforcing Safe Working Procedures by using items supplied for work so as not to endanger themselves or others.

Copies of the Safety Policy Document shall be prominently displayed at all offices and locations under the control of the Company and the requirements drawn to the attention at all relevant personnel.
